- NOTES:
1. Apparatus responding westbound on Burnside can cross the Light Rail tracks at 197th Ave and proceed against traffic (one block) or go on to Stark and double back (14 extra blocks).
  2. Working space is very limited in the complex; 2 to 3 apparatus is about it. Stage additional apparatus on Burnside.
  3. Exposures on the west side are 2-story wood. Fir trees between the buildings will contribute to fire spread.
